QUANEX BUILDING PRODUCTS CORPORATION
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

1. Nature of Operations and Basis of Presentation

Quanex Building Products Corporation is a leading component supplier of engineered products such as (1) energy efficient window components that include flexible insulating glass spacers, (2) extruded vinyl profiles, (3) window and door screens, (4) solar panel sealants and (5) precision-formed metal and wood products for original equipment manufacturers (OEMs). Quanex Building Products Corporation serves a primary customer base in North America and also serves customers in international markets through operating plants in the United Kingdom and Germany, as well as through sales and marketing efforts in other countries.

Unless the context indicates otherwise, references to "Quanex", the "Company", "we", "us" and "our" refer to the consolidated business operations of Quanex Building Products Corporation and its subsidiaries.

The accompanying interim condensed consolidated financial statements include the accounts of Quanex Building Products Corporation. All intercompany accounts and transactions have been eliminated in consolidation. These financial statements have been prepared by us, without audit, pursuant to the rules and regulations of the Securities and Exchange Commission (SEC). Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP) have been condensed or omitted pursuant to such rules and regulations. The consolidated balance sheet as of October 31, 2013 was derived from audited financial information, but does not include all disclosures required by U.S. GAAP. The accompanying financial statements should be read in conjunction with the audited consolidated financial statements and the notes thereto, included in our Annual Report on Form 10-K for the fiscal year ended October 31, 2013. In our opinion, the accompanying financial statements contain all adjustments (which consist of normal recurring adjustments, except as disclosed herein) necessary to fairly present our financial position, results of operations and cash flows for the interim periods. The results of operations for the periods presented are not necessarily indicative of the results to be expected for the full year or for any future periods.

In preparing financial statements, we make informed judgments and estimates that affect the reported amounts of assets and liabilities as of the date of the financial statements and affect the reported amounts of revenues and expenses during the reporting period. We review our estimates on an on-going basis, including those related to impairment of long lived assets and goodwill, contingencies and income taxes. Changes in facts and circumstances may result in revised estimates and actual results may differ from these estimates.

Discontinued Operations

Prior to April 1, 2014, we had two reportable business segments: (1) Engineered Products and (2) Aluminum Sheet Products. On April 1, 2014, we sold our interest in a limited liability company which held the assets of the Nichols Aluminum business (Nichols), the sole operating segment included in our Aluminum Sheet Products reportable segment, to Aleris International, Inc. (Aleris), a privately held Delaware corporation which provides aluminum rolled products and extrusions, aluminum recycling and specification aluminum alloy production. We received net proceeds of \$107.4 million, which includes a working capital adjustment of \$2.6 million which we paid in June 2014, resulting in a gain on the transaction of \$24.1 million, net of related taxes of \$15.1 million. We may be required to reimburse Aleris for certain severance costs related to Nichols employee terminations in accordance with the purchase agreement. Through July 31, 2014, we have paid \$0.4 million of such costs which has reduced the pre-tax gain on the sale. We entered into a transition services agreement whereby we provided certain administrative services to Nichols through May 31, 2014, including information technology support, benefit administration and payroll services.

Nichols represented a significant portion of our assets and operations. We accounted for this sale as a discontinued operation. We revised our financial statements and reclassified the assets and liabilities of Nichols as discontinued operations as of October 31, 2013, and removed the results of operations of Nichols from net income (loss) from continuing operations, and presented separately as income (loss) from discontinued operations, net of taxes, for each of the accompanying condensed consolidated statements of income (loss).

We have included cash held by Nichols as a component of current assets of discontinued operations for the accompanying condensed consolidated balance sheet at October 31, 2013, rather than including this amount as cash and cash equivalents of the consolidated entity at October 31, 2013. For cash flow statement presentation, the sources and uses of cash for Nichols are presented as operating, investing and financing cash flows, as applicable, combined with such cash flows for continuing operations, as permitted by U.S. GAAP.

We have historically purchased approximately \$12.0 million of rolled aluminum product from Nichols annually. We expect to continue to purchase aluminum from Nichols in the normal course of business. We considered whether these aluminum purchases and the services anticipated under the transition services agreement constituted significant continuing involvement with Nichols. Since these purchases are in the normal course of business and the services provided were for a relatively short period and are

QUANEX BUILDING PRODUCTS CORPORATION
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

customary for similar transactions, we determined that this involvement was not deemed significant and does not preclude accounting for the transaction as a discontinued operation. Our purchases of aluminum product from Nichols for the three- and nine-month periods ended July 31, 2014 and 2013 were \$4.5 million and \$11.3 million, respectively, and \$2.8 million and \$10.2 million, respectively.

As of July 31, 2014, we recorded a receivable from Aleris of \$0.3 million, which represented reimbursable costs, primarily associated with workers compensation and health insurance claims. We expect to continue to incur costs associated with these claims which will be reimbursable from Aleris.

In November 2013, Nichols experienced a fire at its Decatur, Alabama facility, which damaged a cold mill used to roll aluminum sheet to a desired thickness. The loss was insured, subject to a \$0.5 million deductible. We capitalized \$6.5 million to rebuild the asset, which was returned to service as of March 31, 2014. We incurred cost of \$2.3 million associated with this loss, including an impairment of \$0.5 million related to retirement of the asset, moving costs, outside service costs, clean-up and the deductible. To date, we have received insurance proceeds of \$1.4 million. We expect to receive total insurance proceeds of approximately \$8.1 million, resulting in an expected gain on involuntary conversion of \$5.7 million. We have recorded a receivable of \$0.9 million as of July 31, 2014, equal to the loss incurred to date (difference between the expense incurred of \$2.3 million and the proceeds received of \$1.4 million), as we believe it is probable and estimable that we will receive proceeds at least equal to our loss incurred. We estimate the remaining gain on involuntary conversion at \$4.8 million. We expect to recognize this gain during the fourth quarter of 2014, when and to the extent that insurance proceeds are received, which will result in an increase in income from discontinued operations, net of tax.

The following table presents the assets and liabilities of Nichols as of October 31, 2013:

	October 31, 2013
<i>Current assets:</i>	
Cash and cash equivalents	\$ 2
Accounts receivable, net	39,374
Inventories, net	16,637
Income taxes receivable	2,314
Deferred income taxes	4,123

QUANEX BUILDING PRODUCTS CORPORATION
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

The following table summarizes the operating results for Nichols for the three-and nine-month periods ended July 31, 2014 and 2013:

	Three Months Ended		Nine Months Ended	
	July 31,		July 31,	
	2014	2013	2014	2013
	(In thousands, except per share amounts)			
Net sales	\$ —	\$ 105,199	\$ 142,797	\$ 299,493
Operating loss	—	(248)	(9,182)	(5,673)
Loss before income taxes, before gain on sale	—	(251)	(8,271)	(5,694)
Income tax benefit, before gain on sale	—	94	3,163	2,104
Gain (loss) on sale, net of tax of \$(3), \$0, \$15,062 and \$0, respectively	(520)	—	24,060	—
Net (loss) income	\$ (520)	\$ (157)	\$ 18,952	\$ (3,590)
Basic (loss) earnings per common share	\$ (0.01)	\$ (0.01)	\$ 0.51	\$ (0.09)
Diluted (loss) earnings per common share	\$ (0.02)	\$ (0.01)	\$ 0.50	\$ (0.09)

2. Acquisitions

On December 31, 2013, we acquired certain vinyl extrusion assets of Atrium Windows and Doors, Inc. (Atrium) at a facility in Greenville, Texas, for \$5.2 million in cash (Greenville). We accounted for this transaction as a business combination resulting in an insignificant gain on the purchase. We entered into a supply agreement with Atrium related to the products produced at Greenville. We believe this acquisition expanded our vinyl extrusion capacity and positioned us with a platform from which to better serve our customers in the southern United States.

The purchase price has been allocated to the fair value of the assets acquired and liabilities assumed, as indicated in the table below. This allocation is based on estimates and assumptions that are subject to change within the purchase price allocation period (generally one year from the acquisition date).

	As of Date of Opening Balance Sheet
	(In thousands)
Net assets acquired:	
Inventories	\$ 161
Prepaid and other current assets	145
Property, plant and equipment	4,695
Intangible assets	290
Deferred income tax liability	(50)
Net assets acquired	\$ 5,241
Consideration:	
Cash, net of cash and cash equivalents acquired	\$ 5,161
Gain recognized on bargain purchase	\$ 80

We used recognized valuation techniques to determine the fair value of the assets and liabilities, including the income approach for customer relationships, with a discount rate that reflects the risk of the expected future cash flows. The gain on bargain purchase of approximately \$0.1 million is included in "Other, net" on our condensed consolidated statement of income (loss) for the nine months ended July 31, 2014.

Pro forma results of operations were not presented because this acquisition was not deemed to be material to our results of operations for the nine months ended July 31, 2014.

QUANEX BUILDING PRODUCTS CORPORATION
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

Alumco

On December 31, 2012, we acquired substantially all of the assets of Alumco, Inc. and its subsidiaries (Alumco), including its aluminum screen business, for \$22.4 million in cash. The purchase agreement contains (1) a working capital clause that provides for an adjustment to the purchase price based on the working capital balance as of the acquisition date and (2) an earn-out clause that provides for the payment of an additional \$0.5 million to Alumco contingent upon the achievement of certain financial targets. We received \$0.4 million from the prior owner of Alumco pursuant to the working capital clause which reduced the consideration paid from \$22.4 million to \$22.1 million during the second quarter of 2013. We recorded contingent consideration of \$0.3 million as the fair value of the earn-out included in the purchase price. As of October 31, 2013, we determined that the earn-out provision criteria would not be met and decreased expense by \$0.3 million.

The purchase price has been allocated to the fair value of the assets acquired and liabilities assumed, as indicated in the table below.

	As of Date of Opening Balance Sheet
	(In thousands)
Net assets acquired:	
Accounts receivable	\$ 3,638
Inventories	5,062
Prepaid and other current assets	140
Property, plant and equipment	4,682
Intangible assets	8,939
Accounts payable	(2,066)
Accrued liabilities	(993)
Current maturities of long-term debt	(14)
Long-term debt	(77)
Goodwill	2,785
Net assets acquired	<u>\$ 22,096</u>
Consideration:	
Cash, net of cash and cash equivalents acquired	<u>\$ 22,096</u>

We used recognized valuation techniques to determine the fair value of the assets and liabilities, including the income approach for customer relationships, with a discount rate that reflects the risk of the expected future cash flows. The goodwill balance is deductible for tax purposes. We believe that this acquisition expanded our product portfolio and geographic distribution capabilities particularly in the vinyl window segment in the screen market.

The Alumco acquisition was not deemed material to our results of operations for the nine months ended July 31, 2013. Therefore, we have not presented pro forma results of operations.

3. Inventories

Inventories consisted of the following at July 31, 2014 and October 31, 2013:

	July 31, 2014	October 31, 2013
	(In thousands)	
Raw materials	\$ 33,215	\$ 26,201
Finished goods and work in process	26,788	19,767
Supplies and other	981	751
Total	<u>60,984</u>	<u>46,719</u>
Less: Inventory reserves	5,701	5,040
Inventories, net	<u>\$ 55,283</u>	<u>\$ 41,679</u>

Fixed costs related to excess manufacturing capacity, if any, have been expensed in the period they were incurred and, therefore, are not capitalized into inventory.

QUANEX BUILDING PRODUCTS CORPORATION
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

Our inventories at July 31, 2014 and October 31, 2013 were valued using the following costing methods:

	July 31, 2014	October 31, 2013
(In thousands)		
LIFO	\$ 4,537	\$ 2,090
FIFO	50,746	39,589
Total	\$ 55,283	\$ 41,679

During interim periods, we estimate a LIFO reserve based on our expectations of year-end inventory levels and costs. If our calculations indicate that an adjustment at year-end will be required, we record a proportionate share of this amount during the period. At year-end, we calculate the actual LIFO reserve and record an adjustment for the difference between the annual calculation and any estimates recognized during the interim periods. Because the interim projections are subject to many factors beyond our control, the results could differ significantly from the year-end LIFO calculation. We recorded no interim LIFO allocation for the three- and nine-month periods ended July 31, 2014 and 2013.

For inventories valued under the LIFO method, replacement cost exceeded the LIFO value by approximately \$1.5 million as of July 31, 2014 and October 31, 2013.

4. Goodwill and Intangible Assets

Goodwill

The change in the carrying amount of goodwill for the nine months ended July 31, 2014 was as follows:

	Nine Months Ended July 31, 2014
(In thousands)	
Beginning balance as of November 1, 2013	\$ 71,866
Foreign currency translation adjustment	(43)
Balance as of the end of the period	\$ 71,823

Identifiable Intangible Assets

Amortizable intangible assets consisted of the following as of July 31, 2014 and October 31, 2013:

	July 31, 2014		October 31, 2013	
	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
(In thousands)				
Customer relationships	\$ 53,071	\$ 18,674	\$ 52,793	\$ 15,630
Trademarks and trade names	44,748	19,661	44,576	17,498
Patents and other technology	25,275	12,763	25,390	11,319
Other	1,392	951	1,392	742
Total	\$ 124,486	\$ 52,049	\$ 124,151	\$ 45,189

Included in intangible assets as of July 31, 2014 were customer relationships of \$0.3 million associated with the Greenville acquisition. These assets have estimated useful lives of 5 years. See Note 2, "Acquisitions", included herewith.

For the three- and nine-month periods ended July 31, 2014 and 2013, we had aggregate amortization expense of \$2.3 million and \$6.9 million, respectively, and \$2.3 million and \$6.6 million, respectively.

QUANEX BUILDING PRODUCTS CORPORATION
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

Estimated remaining amortization expense, assuming current intangible balances and no new acquisitions, for each of the fiscal years ending October 31, was as follows (in thousands):

	Estimated Amortization Expense
2014 (remaining three months)	\$ 2,263
2015	8,930
2016	8,660
2017	8,554
2018	8,305
Thereafter	35,725
Total	\$ 72,437

5. Debt and Capital Lease Obligations

Debt consisted of the following at July 31, 2014 and October 31, 2013:

	July 31, 2014	October 31, 2013
	(In thousands)	
Revolving Credit Facility	\$ —	\$ —
City of Richmond, Kentucky Industrial Building Revenue Bonds	600	700
Capital lease obligations	218	163
Total debt	818	863
Less: Current maturities of long-term debt	203	162
Long-term debt	\$ 615	\$ 701

On January 28, 2013, we entered into a Senior Unsecured Revolving Credit Facility (the Credit Facility) that has a five-year term and permits aggregate borrowings at any time of up to \$150 million, with a letter of credit sub-facility, a swing line sub-facility and a multi-currency sub-facility. Borrowings denominated in U.S. dollars bear interest at a spread above the London Interbank Borrowing Rate (LIBOR) or a base rate derived from the prime rate. Foreign denominated borrowings would bear interest at a spread above the LIBOR applicable to such currencies. Subject to customary conditions, we may request that the aggregate commitments under the Credit Facility be increased by up to \$100 million, with total commitments not to exceed \$250 million. The Credit Facility replaced our previous senior unsecured revolving credit facility (the Retired Facility) that was scheduled to expire on April 23, 2013.

The Credit Facility requires us to comply with certain financial covenants, the terms of which are defined therein. Specifically, we must not permit, on a quarterly basis, our ratio of consolidated EBITDA to consolidated interest expense as defined (Minimum Interest Coverage Ratio), to fall below 3.00:1 or our ratio of consolidated funded debt to consolidated EBITDA, as defined (Maximum Consolidated Leverage Ratio), to exceed 3.25:1. The Maximum Consolidated Leverage Ratio is the ratio of consolidated EBITDA to consolidated interest expense, in each case for the previous four consecutive fiscal quarters. EBITDA is defined by the indenture to include pro forma EBITDA of acquisitions and to exclude certain items such as goodwill and intangible asset impairments and certain other non-cash charges and non-recurring items. Subject to our compliance with the covenant requirements, the amount available under the Credit Facility is a function of: (1) our trailing twelve-month EBITDA; (2) the Minimum Interest Coverage Ratio and Maximum Consolidated Leverage Ratio allowed under the Credit Facility; and (3) the aggregate amount of our outstanding debt and letters of credit. As of July 31, 2014, we were in compliance with the financial covenants set forth in the Credit Facility.

As of July 31, 2014, the amount available to us for use under the Credit Facility was \$143.0 million and we had outstanding letters of credit of \$6.1 million. For the nine-month period ended July 31, 2014, we did not borrow any amounts under the Credit Facility, and thus had no outstanding borrowings at July 31, 2014. Our current borrowing rate under the Credit Facility was 3.25% and 1.20% for the swing-line sub facility and the revolver, respectively, at July 31, 2014. As of October 31, 2013, the amount available to us for use under the Credit Facility was \$139.0 million and we had outstanding letters of credit of \$6.2 million. Our borrowing rate under the Credit Facility was 3.25% and 1.20% for the swing-line sub facility and the revolver, respectively, at October 31, 2013.

QUANEX BUILDING PRODUCTS CORPORATION
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

Prior to January 28, 2013, we maintained a \$270.0 million senior unsecured revolving credit facility (the Retired Facility) which had been executed on April 23, 2008 and was scheduled to mature on April 23, 2013. The Retired Facility provided for up to \$50.0 million of standby letters of credit, limited based on availability, as defined. Amounts borrowed under the facility were to bear interest at a spread above LIBOR based on a combined leverage and ratings grid. In addition, the Retired Facility contained restrictive debt covenants, as defined in the indenture, and contained certain limits on additional indebtedness, asset or equity sales and acquisitions. During the period from November 1, 2012 through January 28, 2013, we were in compliance with our debt covenants and did not borrow funds pursuant to the Retired Facility.

6. Retirement Plans

Pension Plan

Our non-contributory, single employer defined benefit pension plan covers a majority of our employees. Employees of acquired companies are covered after a transitional period. The net periodic pension cost for this plan for the three- and nine-month periods ended July 31, 2014 and 2013 was as follows:

	Three Months Ended		Nine Months Ended	
	July 31,		July 31,	
	2014	2013	2014	2013
	(In thousands)			
Service cost	\$ 828	\$ 955	\$ 2,485	\$ 2,865
Interest cost	266	197	797	590
Expected return on plan assets	(431)	(350)	(1,292)	(1,050)
Amortization of net loss	—	92	—	277
Net periodic benefit cost	<u>\$ 663</u>	<u>\$ 894</u>	<u>\$ 1,990</u>	<u>\$ 2,682</u>

In February 2014, we contributed \$1.1 million to fund our plan and currently expect to make additional contributions in September 2014.

Other Plans

We also have a supplemental benefit plan covering certain executive officers and a non-qualified deferred compensation plan covering members of the Board of Directors and certain key employees. As of July 31, 2014 and October 31, 2013, our liability under the supplemental benefit plan was approximately \$1.8 million and \$3.6 million, respectively, and under the deferred compensation plan was approximately \$3.4 million and \$6.7 million, respectively. In January 2014, we distributed \$3.3 million to our former Chairman, President and Chief Executive Officer, Mr. David Petratis, which represented his vested balances under our deferred compensation plan, and in February 2014, we paid \$1.7 million to Mr. Petratis, pursuant to our supplemental employee retirement plan.

7. Warranty Obligations

We accrue warranty obligations as we recognize revenue associated with certain products. We make provisions for our warranty obligations based upon historical experience of costs incurred for such obligations adjusted, as necessary, for current conditions and factors. During January 2014, we reduced our warranty accrual by \$2.8 million for certain products associated with our insulating glass business that were discontinued in a prior year and for which claim activity for a particular customer had ceased. There are significant uncertainties and judgments involved in estimating our warranty obligations, including changing product designs, differences in customer installation processes and future claims experience which may vary from historical claims experience. Therefore, the ultimate amount we incur as warranty costs in the near and long-term may not be consistent with our current estimate.

QUANEX BUILDING PRODUCTS CORPORATION
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

A reconciliation of the activity related to our accrued warranty, including both the current and long-term portions (reported in accrued liabilities and other liabilities, respectively, on the accompanying condensed consolidated balance sheet) follows:

	Nine Months Ended July 31, 2014	
	(In thousands)	
Beginning balance as of November 1, 2013	\$	3,684
Provision for warranty expense		670
Change in accrual for pre-existing warranties		(3,065)
Warranty costs paid		(387)
Total accrued warranty as of the end of the period		902
Less: Current portion of accrued warranty		372
Long-term portion of accrued warranty	\$	530

8. Income Taxes

To determine our income tax expense for interim periods, consistent with accounting standards, we apply the estimated annual effective income tax rate to year-to-date results except when this method does not result in a reliable estimate of year-to-date income tax expense. For the three- and nine-month periods ended July 31, 2013, we used the discrete or cut-off method, which allows for the use of a year-to-date effective income tax rate that is more applicable to our results. This approach is appropriate where a small change in estimated income could produce a large change in the estimated annual effective tax rate. Our estimated annual effective tax rates from continuing operations for the nine months ended July 31, 2014 and 2013, were 38.2% and a benefit of 36.5%, respectively. The increase in the 2014 effective rate is attributable to the change in the tax status of our facility in the United Kingdom (UK). On November 1, 2013, the assets of our UK branch were contributed to a newly formed wholly-owned UK subsidiary. This change resulted in a U.S. taxable charge and was booked as a discrete item in the first quarter.

We evaluate the likelihood of realization of our deferred tax assets by considering both positive and negative evidence. We believe there is no need for a valuation allowance of the federal net operating losses. However, if we record three years of cumulative losses, after adjusting for non-recurring items, we may be required to increase our valuation allowance to the full extent of our net deferred tax assets of \$32.2 million. We will continue to evaluate our position throughout the year. We maintain a valuation allowance for certain state net operating losses which totaled \$2.5 million at July 31, 2014.

Our unrecognized tax benefit (UTB) is related to the 2008 spin-off of Quanex from its former parent and certain state tax items regarding the interpretation of tax laws and regulations. The total UTB at October 31, 2013 was \$13.2 million. Of this amount, \$5.4 million was recorded as a liability for uncertain tax positions and \$7.8 million was recorded as deferred income taxes (non-current assets) on the accompanying condensed consolidated balance sheet. During the nine months ended July 31, 2014, we reduced the liability for uncertain tax positions related to the spin-off by \$1.9 million due to the lapse in the statute of limitations, which resulted in a non-cash increase in retained earnings of \$1.6 million and a decrease in income tax expense of \$0.3 million. At July 31, 2014, \$4.6 million is recorded as a liability for uncertain tax positions and \$6.8 million is recorded in deferred income taxes. The total UTB at July 31, 2014 is \$11.4 million, which includes \$10.7 million for which the disallowance of such items would not affect the annual effective tax rate.

Judgment is required in assessing the future tax consequences of events that have been recognized in our financial statements or tax returns. The final outcome of the future tax consequences of legal proceedings, if any, as well as the outcome of competent authority proceedings, changes in regulatory tax laws, or interpretation of those tax laws could impact our financial statements. We are subject to the effect of these matters occurring in various jurisdictions. We believe it is reasonably possible that a decrease of approximately \$1.8 million in the UTB may be recognized within the next twelve months as a result of the lapse in the statute of limitations.

Our federal income tax returns for the tax years ended October 31, 2011 and 2012 are currently under examination by the Internal Revenue Service.

QUANEX BUILDING PRODUCTS CORPORATION
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

9. Contingencies

Environmental

We are subject to extensive laws and regulations concerning the discharge of materials into the environment and the remediation of chemical contamination. To satisfy such requirements, we must invest capital and make other expenditures on an on-going basis. We accrue for remediation obligations and adjust our accruals as information becomes available and circumstances develop. Those estimates may change substantially depending on various factors, including the nature and extent of contamination, appropriate remediation technologies, and regulatory approvals. When we accrue for environmental remediation liabilities, costs of future expenditures are not discounted to their present value, unless the amount and timing of the expenditures are fixed or reliably determinable. When environmental laws are deemed to impose joint and several liability for the costs of responding to contamination, information indicates that it is probable we have incurred a loss, and such amount is estimable, we accrue our allocable share of liability taking into account the number of parties participating, the ability of such counter-parties to pay their share of the costs, the volume and nature of the wastes involved, the nature of anticipated response actions, and the nature of our alleged connection to the contamination. The cost of environmental matters has not had a material adverse effect on our operations or financial condition in the past, and we are not currently aware of any conditions that, we believe, are likely to have a material adverse effect on our operations, financial condition or cash flows.

We are currently not subject to any remediation activities. Prior to April 1, 2014, we had remediation activities associated with one of our subsidiaries, Nichols Aluminum-Alabama, LLC, a component business unit of Nichols. As discussed in Note 1, "Nature of Operations and Basis of Presentation - Discontinued Operations", on April 1, 2014, we sold Nichols and the liabilities associated with this on-going remediation effort were assumed by Aleris International, Inc.

Litigation

From time to time, we, along with our subsidiaries, are involved in various litigation matters arising in the ordinary course of our business. Although the ultimate resolution and impact of such litigation is not presently determinable, we believe that the eventual outcome of such litigation will not have a material adverse effect on our overall financial condition, results of operations or cash flows.

10. Derivative Instruments

Our derivative activities are subject to the management, direction, and control of the Chief Financial Officer and Chief Executive Officer. Certain transactions in excess of specified levels require further approval from the Board of Directors.

The nature of our business activities requires the management of various financial and market risks, including those related to changes in foreign currency exchange rates and aluminum scrap prices. We have historically used foreign currency forwards and options, and aluminum swap contracts to mitigate or eliminate certain of those risks at our subsidiaries. We use foreign currency contracts to offset fluctuations in the value of accounts receivable and payable balances that are denominated in currencies other than the U.S. dollar, including the Euro, British Pound and Canadian Dollar. Historically, we have entered into swap contracts to minimize our exposure to aluminum commodity prices. Through the use of swap contracts, we attempt to protect ourselves from the effects of changing prices of aluminum on our cost of sales. To the extent that the raw material costs factored into the firm price sales commitments are matched with firm price raw material purchase commitments, changes in aluminum prices should have no effect. Currently, we do not enter into derivative transactions for speculative or trading purposes. We are exposed to credit loss in the event of nonperformance by the counterparties to our derivative transactions. We attempt to mitigate this risk by monitoring the creditworthiness of our counterparties and limiting our exposure to individual counterparties. In addition, we have established master netting agreements in certain cases to facilitate the settlement of gains and losses on specific derivative contracts.

We have not designated any of our derivative contracts as hedges for accounting purposes in accordance with the provisions under the Accounting Standards Codification topic 815 "*Derivatives and Hedging*" (ASC 815). Therefore, changes in the fair value of these contracts and the realized gains and losses are recorded in the condensed consolidated statements of income (loss) for the three- and nine-month periods ended July 31, 2014 and 2013 as follows (in thousands):

Location of Gain or (Loss):		Three Months Ended		Nine Months Ended	
		July 31,		July 31,	
		2014	2013	2014	2013
Other, net	Foreign currency derivatives	\$ 198	\$ (231)	\$ 104	\$ (613)
Cost of sales	Aluminum derivatives	\$ —	\$ (44)	\$ —	\$ (288)

QUANEX BUILDING PRODUCTS CORPORATION
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

We have chosen not to offset any of our derivative instruments in accordance with the provisions of ASC 815. Therefore, the assets and liabilities are presented on a gross basis on our accompanying condensed consolidated balance sheets.

The fair values of our outstanding derivative contracts as of July 31, 2014 and October 31, 2013 were as follows (in thousands):

	July 31, 2014	October 31, 2013
<i>Prepaid and other current assets:</i>		
Foreign currency derivatives	\$ 17	\$ 164
<i>Accrued liabilities:</i>		
Foreign currency derivatives	—	39
Aluminum derivatives	\$ —	\$ 64

The following table summarizes the notional amounts and fair value of outstanding derivative contracts at July 31, 2014 and October 31, 2013 (in thousands):

		Notional as indicated		Fair Value in \$	
		July 31, 2014	October 31, 2013	July 31, 2014	October 31, 2013
<i>Foreign currency derivatives:</i>					
Sell EUR, buy USD	EUR	4,045	7,258	\$ 14	\$ 150
Sell CAD, buy USD	CAD	403	615	3	(2)
Sell EUR, buy GBP	EUR	61	880	—	14
Buy EUR, sell GBP	EUR	—	967	—	(12)
Buy GBP, sell USD	GBP	—	2,435	—	(25)
Aluminum derivatives	LBS	—	187	\$ —	\$ (64)

For the classification in the fair value hierarchy, see Note 11, "Fair Value Measurement of Assets and Liabilities", included herewith.

11. Fair Value Measurement of Assets and Liabilities

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value hierarchy distinguishes between (1) market participant assumptions developed based on market data obtained from independent sources (observable inputs) and (2) an entity's own assumptions about market participant assumptions developed based on the best information available in the circumstances (unobservable inputs). The fair value hierarchy consists of three broad levels, which gives the highest priority to Level 1 and the lowest priority to Level 3. The three levels of the fair value hierarchy are described below:

- Level 1 - Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.
- Level 2 - Inputs other than quoted prices included within Level 1 that are observable for the asset or liability either directly or indirectly including quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not active; inputs other than quoted prices that are observable for the asset or liability (e.g., interest rates) and inputs that are derived principally from or corroborated by observable market data by correlation or other means.
- Level 3 - Inputs that are both significant to the fair value measurement and unobservable.

QUANEX BUILDING PRODUCTS CORPORATION
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

The following table summarizes the assets and liabilities measured on a recurring basis based on the fair value hierarchy (in thousands):

	July 31, 2014				October 31, 2013			
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total
Assets								
Short-term investments	\$ 79,977	\$ —	\$ —	\$ 79,977	\$ 42,639	\$ —	\$ —	\$ 42,639
Foreign currency derivatives	—	17	—	17	—	164	—	164
Total assets	\$ 79,977	\$ 17	\$ —	\$ 79,994	\$ 42,639	\$ 164	\$ —	\$ 42,803
Liabilities								
Aluminum derivatives	\$ —	\$ —	\$ —	\$ —	\$ —	\$ (64)	\$ —	\$ (64)
Foreign currency derivatives	—	—	—	—	—	(39)	—	(39)
Total liabilities	\$ —	\$ —	\$ —	\$ —	\$ —	\$ (103)	\$ —	\$ (103)

We held short-term investments (with an original maturity of three months or less) in commercial paper at July 31, 2014. As of October 31, 2013, we had short-term investments in money market funds. We have included these investments as cash and cash equivalents in the accompanying condensed consolidated balance sheets. These investments are measured at fair value based on active market quotations and are therefore classified as Level 1. All of our derivative contracts are valued using quoted market prices from brokers or exchanges and are classified within Level 2 of the fair value hierarchy.

As of July 31, 2014 and October 31, 2013, we had approximately \$2.4 million and \$3.7 million, respectively, of certain property, plant and equipment that was recorded at fair value on a non-recurring basis and classified as Level 3. The fair value was based on broker opinions. The decrease in value of \$1.3 million from October 31, 2013 to July 31, 2014 was due to an asset sale of \$0.8 million and an asset impairment charge of \$0.5 million associated with a facility in Barbourville, Kentucky.

Carrying amounts reported on the balance sheet for cash, cash equivalents, accounts receivable and accounts payable approximate fair value due to the short-term maturity of these instruments. Our outstanding debt was variable rate debt that re-prices frequently, thereby limiting our exposure to significant change in interest rate risk. As a result, the fair value of our debt instruments approximates carrying value at July 31, 2014 and October 31, 2013 (Level 3 measurement).

12. Stock-Based Compensation

We have established and maintain an Omnibus Incentive Plan (2008 Plan) that provides for the granting of restricted stock awards, stock options, restricted stock units, performance share awards and other stock-based and cash-based awards. The 2008 Plan is administered by the Compensation and Management Development Committee of the Board of Directors.

The aggregate number of shares of common stock originally authorized for grant under the 2008 Plan was 2,900,000. At our annual shareholder meeting held in February 2011, the shareholders approved an amendment which increased the aggregate number of shares available for grant by 2,400,000 shares; and at our annual shareholder meeting held in February 2014, the shareholders approved an amendment which increased the aggregate number of shares available for grant under the 2008 Plan by an additional 2,350,000 shares.

Restricted Stock Awards

Restricted stock awards are granted to key employees and officers annually, and typically cliff vest over a three-year period with service and continued employment as the only vesting criteria. The recipient of the restricted stock awards is entitled to all of the rights of a shareholder, except that the awards are nontransferable during the vesting period. The fair value of the restricted stock award is established on the grant date and then expensed over the vesting period resulting in an increase in additional paid-in-capital. Shares are generally issued from treasury stock at the time of grant.

QUANEX BUILDING PRODUCTS CORPORATION
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

A summary of non-vested restricted stock awards activity during the nine months ended July 31, 2014 is presented below:

	Restricted Stock Awards	Weighted Average Grant Date Fair Value per Share
Non-vested at October 31, 2013	183,400	\$ 17.46
Granted	83,400	17.67
Cancelled	(10,400)	20.00
Vested	(30,700)	17.45
Non-vested at July 31, 2014	225,700	\$ 17.42

The total weighted average grant-date fair value of restricted stock awards that vested during the nine-month periods ended July 31, 2014 and 2013 was \$0.5 million and \$1.1 million, respectively. As of July 31, 2014, total unrecognized compensation cost related to unamortized restricted stock awards was \$2.2 million. We expect to recognize this expense over the remaining weighted average vesting period of 2.0 years.

Stock Options

Stock options are awarded to key employees, officers and non-employee directors. Director stock options vest immediately while employee and officer stock options typically vest ratably over a three-year period with service and continued employment as the vesting conditions. Our stock options may be exercised up to a maximum of ten years from the date of grant. The fair value of the stock options is determined on the grant date and expensed over the vesting period resulting in an increase in additional paid-in-capital.

We use a Black-Scholes pricing model to estimate the fair value of stock options. A description of the methodology for the valuation assumptions was disclosed in our Annual Report on Form 10-K for the fiscal year ended October 31, 2013.

The following table provides a summary of assumptions used to estimate the fair value of our stock options issued during the nine-month periods ended July 31, 2014 and 2013.

	Nine Months Ended	
	July 31,	
	2014	2013
Weighted-average expected volatility	55.7%	54.9%
Weighted-average expected term (in years)	5.8	5.2
Risk-free interest rate	1.8%	1.0%
Expected dividend yield over expected term	1.0%	1.0%
Weighted average grant date fair value	\$8.51	\$8.71

The following table summarizes our stock option activity for the nine months ended July 31, 2014:

	Stock Options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term (in years)	Aggregate Intrinsic Value (000s)
Outstanding at October 31, 2013	2,875,276	\$ 15.64		
Granted	164,800	17.68		
Exercised	(304,528)	10.57		
Forfeited/Expired	(158,612)	18.58		
Outstanding at July 31, 2014	2,576,936	\$ 16.19	6.4	\$ 4,164
Vested or expected to vest at July 31, 2014	2,539,774	\$ 16.15	6.4	\$ 4,147
Exercisable at July 31, 2014	1,942,924	\$ 15.55	5.7	\$ 3,860

Intrinsic value is the amount by which the market price of the common stock on the date of exercise exceeds the exercise price of the stock option. The total intrinsic value of stock options exercised during the nine months ended July 31, 2014 and 2013, was \$2.7 million and \$0.4 million, respectively. The total fair value of stock options vested during the nine months ended July 31,

QUANEX BUILDING PRODUCTS CORPORATION
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

2014 and 2013, was \$3.5 million and \$3.0 million, respectively. As of July 31, 2014, total unrecognized compensation cost related to stock options was \$2.6 million. We expect to recognize this expense over the remaining weighted average vesting period of 1.9 years.

Restricted Stock Units

Restricted stock units may be awarded to key employees and officers from time to time, and annually to non-employee directors. The director restricted stock units vest immediately, whereas restricted stock units awarded to employees and officers typically cliff vest after a three-year period with service and continued employment as the vesting conditions. Restricted stock units are not considered outstanding shares and do not have voting rights, although the holder does receive a cash payment equivalent to the dividend paid, on a one-for-one basis, on our outstanding common shares. Once the vesting criteria is met, each restricted stock unit is payable to the holder in cash based on the market value of one share of our common stock. Accordingly, we record a liability for the restricted stock units on our balance sheet and recognize any changes in the market value during each reporting period as compensation expense.

The following table summarizes non-vested restricted stock unit activity during the nine months ended July 31, 2014:

	Restricted Stock Units	Weighted Average Grant Date Fair Value per Share
Non-vested at October 31, 2013	101,000	\$ 15.62
Granted	5,700	17.63
Vested	(23,200)	18.05
Non-vested at July 31, 2014	83,500	\$ 15.08

Cash used to settle restricted stock units during the nine-month periods ended July 31, 2014, and 2013 was \$0.5 million and \$0.1 million, respectively.

Performance Share Awards

Historically, we have granted performance units to key employees and officers annually. These awards cliff vest after a three-year period with service and performance measures such as relative total shareholder return and earnings per share growth as vesting conditions. These awards were treated as a liability and marked to market based upon our assessment of the achievement of the performance measures, with the assistance of third-party compensation consultants.

For the annual grant which occurred in December 2013, we granted performance shares rather than performance units. These performance share awards have the same performance measures (relative total shareholder return and earnings per share growth). However, the number of shares earned is variable depending on the metrics achieved, and the settlement method is 50% in cash and 50% in our common stock.

To account for this award, we have bi-furcated the portion subject to a market condition (relative total shareholder return) and the portion subject to an internal performance measure (earnings per share growth). We have further bi-furcated these awards based on the settlement method, as the portion expected to settle in stock (equity component) and the portion expected to settle in cash (liability component).

To value the shares subject to the market condition, we utilized a Monte Carlo simulation model to arrive at a grant-date fair value. This amount will be expensed over the three-year term of the award with a credit to additional paid-in-capital. To value the shares subject to the internal performance measure, we used the value of our common stock on the date of grant as the grant-date fair value per share. This amount will be expensed over the three-year term of the award, with a credit to additional paid-in-capital, and could fluctuate depending on the number of shares ultimately expected to vest based on our assessment of the probability that the performance conditions will be achieved. For both performance conditions, the portion of the award expected to settle in cash will be recorded as a liability and will be marked to market over the three-year term of the award, and could fluctuate depending on the number of shares ultimately expected to vest.

In conjunction with the annual grant in December 2013, we awarded 155,800 performance shares, of which 0% to 200% of these shares may ultimately vest, depending on the achievement of the performance conditions. During the third quarter of 2014, 7,000 of these performance shares were forfeited. For the period from the date of grant through July 31, 2014, we have recorded \$0.7 million of compensation expense related to these performance share awards.

QUANEX BUILDING PRODUCTS CORPORATION
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

Performance share awards are not considered outstanding shares and do not have voting rights, although dividends are accrued over the performance period and will be payable in cash based upon the number of performance shares ultimately earned.

Treasury Shares

Shares are generally issued from treasury stock at the time of grant of restricted stock awards and the exercise of stock options. On the subsequent issuance of treasury shares, we record proceeds in excess of cost as an increase in additional paid in capital.

The following table summarizes the treasury stock activity during the nine months ended July 31, 2014:

	Nine Months Ended July 31, 2014
Beginning balance as of November 1, 2013	488,385
Restricted stock awards granted	(83,400)
Stock options exercised	(304,528)
Balance at end of period	<u>100,457</u>

13. Other Income (Expense)

Other income (expense) included under the caption "Other, net" on the accompanying condensed consolidated statements of income (loss), consisted of the following for the three- and nine-month periods ended July 31, 2014 and 2013:

	Three Months Ended		Nine Months Ended	
	July 31,		July 31,	
	2014	2013	2014	2013
	(In thousands)			
Foreign currency transaction gains (losses)	\$ (262)	\$ 167	\$ (196)	\$ 498
Foreign currency derivative gains (losses)	198	(231)	104	(613)
Interest income	54	14	76	48
Other	2	5	82	(60)
Other income (expense)	<u>\$ (8)</u>	<u>\$ (45)</u>	<u>\$ 66</u>	<u>\$ (127)</u>

14. Segment Information

We have four operating segments which we aggregate into one reportable segment, in accordance with ASC Topic 280-10-50, "Segment Reporting" (ASC 280). This aggregation is based on factors including, but not limited to: (1) similar nature of products serving the building products industry, specifically the fenestration business; (2) similar production processes, although there are some differences in the amount of automation amongst operating plants; (3) similar types or classes of customers, namely the primary original equipment manufacturers (OEMs) in the window and door industry; (4) similar distribution methods for product delivery, although the extent of the use of third-party distributors will vary amongst the businesses; (5) similar regulatory environment; and (6) converging long-term economic similarities. The primary market drivers of our business are residential remodeling and replacement activity (R&R) and new home construction.

Prior to April 1, 2014, we presented two reportable operating segments: (1) Engineered Products and (2) Aluminum Sheet Products. In addition, we recorded LIFO inventory adjustments, corporate office charges and inter-segment eliminations as Corporate & Other. On April 1, 2014, we sold Nichols, the sole operating segment included in our Aluminum Sheet Products reportable segment. To account for Nichols as a discontinued operation, we reclassified certain costs from Corporate & Other to Nichols, including a portion of the LIFO reserve, as well as insurance accruals related to incurred but not reported workers compensation claims, to properly reflect these direct expenses as a component of the disposal group.

The following table reconciles our segment presentation as previously reported in our Quarterly Report on Form 10-Q for the quarter ended July 31, 2013, to the current presentation.

15. Earnings Per Share

We compute basic earnings per share by dividing net income by the weighted average number of common shares outstanding during the period. Diluted earnings per common and potential common shares include the weighted average of additional shares

QUANEX BUILDING PRODUCTS CORPORATION
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

associated with the incremental effect of dilutive employee stock options, non-vested restricted stock as determined using the treasury stock method prescribed by U.S. GAAP and contingent shares associated with performance share awards, if dilutive.

Basic and diluted earnings per share for the three- and nine-month periods ended July 31, 2014, were calculated as follows (in thousands, except per share data):

	Three Months Ended July 31, 2014		
	Net Income	Weighted Average Shares	Per Share
Basic earnings per common share	\$ 8,047	37,296	\$ 0.22
<i>Effect of dilutive securities:</i>			
Stock options	—	409	
Restricted stock awards	—	118	
Diluted earnings per common share	<u>\$ 8,047</u>	<u>37,823</u>	<u>\$ 0.21</u>

	Three Months Ended July 31, 2013		
	Net Income	Weighted Average Shares	Per Share
Basic earnings per common share	\$ 4,969	36,856	\$ 0.13
<i>Effect of dilutive securities:</i>			
Stock options	—	464	
Restricted stock awards	—	93	
Diluted earnings per common share	<u>\$ 4,969</u>	<u>37,413</u>	<u>\$ 0.13</u>

	Nine Months Ended July 31, 2014		
	Net Income	Weighted Average Shares	Per Share
Basic earnings per common share	\$ 24,278	37,171	\$ 0.65
<i>Effect of dilutive securities:</i>			
Stock options	—	482	
Restricted stock awards	—	103	
Diluted earnings per common share	<u>\$ 24,278</u>	<u>37,756</u>	<u>\$ 0.64</u>

Basic and diluted loss per share was \$0.28 for the nine-month period ended July 31, 2013. The computation of diluted earnings (loss) per share excludes outstanding stock options and other common stock equivalents when their inclusion would be anti-dilutive. This is always the case when an entity incurs a net loss, as we did for the nine-month period ended July 31, 2013. During this period, common stock equivalents of 501,721 and restricted stock shares of 102,714 were excluded from the computation of diluted earnings (loss) per share.

For the three- and nine-month periods ended July 31, 2014 and 2013, there were no potentially dilutive contingent shares related to performance share awards.

For the three- and nine-month periods ended July 31, 2014 and 2013, we had 970,976 and 940,336 securities, respectively, and 838,380 and 893,808 securities, respectively, that were potentially dilutive in future earnings per share calculations. Such dilution will be dependent on the excess of the market price of our stock over the exercise price and other components of the treasury stock method.

16. New Accounting Pronouncements

In June 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2014-12, *Compensation - Stock Compensation (Topic 718): Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could be Achieved after the Requisite Service Period*. This amendment requires that a performance target that affects vesting and that could be achieved after the requisite service period be treated as a performance condition that affects vesting or as a nonvesting condition that affects the grant-date fair value of an award, and provides explicit guidance for

QUANEX BUILDING PRODUCTS CORPORATION
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (continued)

those awards. This guidance becomes effective for fiscal years beginning on or after December 15, 2015. We expect to adopt this guidance during fiscal 2017, and we are currently evaluating the impact on our consolidated financial statements.

In May 2014, the FASB issued Accounting Standards Update (ASU) No. 2014-09, “*Revenue from Contracts with Customers.*” This guidance prescribes a methodology to determine when revenue is recognizable and constitutes a principles-based approach to revenue recognition based on the consideration to which the entity expects to be entitled in exchange for goods or services. In addition, this guidance requires additional disclosure in the notes to the financial statements with regard to the methodology applied. This pronouncement becomes effective for annual reporting periods beginning after December 15, 2016, and will essentially supersede and replace existing revenue recognition rules in U.S. GAAP, including industry-specific guidance. We expect to adopt this pronouncement in fiscal 2018, and we are currently evaluating the impact on our consolidated financial statements.

In April 2014, the FASB issued Accounting Standards Update (ASU) No. 2014-08, *Presentation of Financial Statements (Topic 205) and Property, Plant, and Equipment (Topic 360): Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity.* This new guidance clarifies the definition of a discontinued operation as a disposal of a component of any entity, or a group of such components, which represent a strategic shift that has or will have a major effect on an entity’s operations and financial results. This guidance should result in fewer applications of discontinued operations accounting treatment. However, if such accounting treatment is required, the guidance requires additional footnote disclosures with regard to the major classes of line items constituting pretax profit or loss of the discontinued operation, a reconciliation of the major classes of assets and liabilities of the discontinued operation, and additional disclosure with regard to cash flows of the discontinued operation. This guidance becomes effective for fiscal years beginning on or after December 15, 2014. We expect to adopt this guidance during fiscal 2016, and we are currently evaluating the impact on our consolidated financial statements.

In July 2013, the FASB issued Accounting Standards Update (ASU) No. 2013-11, *Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists*, which provides guidance related to the presentation of current and deferred income taxes on the balance sheet. In general, an entity must present an unrecognized tax benefit related to a net operating loss carryforward, similar tax loss or tax credit carryforward, as a reduction of a deferred tax asset, except in prescribed circumstances through which liability presentation would be appropriate. This guidance becomes effective for fiscal years beginning after December 15, 2013. We expect to adopt this guidance during fiscal 2015 with no material impact on our consolidated financial statements.

In February 2013, the FASB issued ASU No. 2013-2, *Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income*, which requires an entity to provide information about the amounts reclassified out of accumulated other comprehensive income by component. In addition, an entity is required to present, either on the face of the statement where net income is presented or in the notes, significant amounts reclassified out of accumulated other comprehensive income by the respective line items of net income but only if the amount reclassified is required under U.S. GAAP to be reclassified to net income in its entirety in the same reporting period. For other amounts that are not required under U.S. GAAP to be reclassified in their entirety to net income, an entity is required to cross-reference to other disclosures required under U.S. GAAP that provide additional detail about those amounts. We adopted ASU 2013-2 as of November 1, 2013, with no material impact on our consolidated financial statements.

In December 2011, the FASB issued ASU No. 2011-11, *Disclosures about Offsetting Assets and Liabilities*, which requires entities to disclose both gross information and net information about instruments and transactions eligible for offset in the statement of financial position and instruments and transactions subject to an agreement similar to a master netting arrangement. The scope of this standard, which was subsequently clarified by ASU 2013-1, includes derivatives, sale and repurchase agreements, reverse sale and repurchase agreements, and securities borrowing and securities lending arrangements. These disclosures assist users of financial statements in evaluating the effect or potential effect of netting arrangements on an entity’s financial position. We adopted ASU 2011-11 as of November 1, 2013, with no material impact on our consolidated financial statements.

17. Subsequent Events

On September 5, 2014, our Board of Directors approved a stock repurchase program that authorized the repurchase of up to \$75 million worth of shares of our common stock. Repurchases under the new program will be made in open market transactions or privately negotiated transactions, subject to market conditions, applicable legal requirements and other relevant factors. All stock purchases to be made under the program will be made in accordance with SEC regulations and the terms of an appropriate 10b5-1 Trading Plan, which will contain certain price, market, volume and timing constraints. The program does not have an expiration date or a limit on the number of shares that may be purchased. In connection with its approval of the new stock repurchase program, the Board also cancelled the stock repurchase program that it had previously approved on May 27, 2010 and August 25, 2011.

Unless the context indicates otherwise, references to "Quanex", the "Company", "we", "us" and "our" refer to the consolidated business operations of Quanex Building Products Corporation and its subsidiaries.

Cautionary Note Regarding Forward-Looking Statements

Certain of the statements contained in this document and in documents incorporated by reference herein, including those made under the caption "Management's Discussion and Analysis of Financial Condition and Results of Operations" are "forward-looking" statements as defined under the Private Securities Litigation Reform Act of 1995. Generally, the words "expect," "believe," "intend," "estimate," "anticipate," "project," "will" and similar expressions identify forward-looking statements, which generally are not historical in nature. Forward looking statements are (1) all statements which address future operating performance, (2) events or developments that we expect or anticipate will occur in the future, including statements relating to volume, sales, operating income and earnings per share, and (3) statements expressing general outlook about future operating results. Forward-looking statements are subject to certain risks and uncertainties that could cause actual results to differ materially from our historical experience and our current projections or expectations. As and when made, we believe that these forward-looking statements are reasonable. However, caution should be taken not to place undue reliance on any such forward-looking statements since such statements speak only as of the date when made and there can be no assurance that such forward-looking statements will occur. We are not obligated to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

Factors that could cause actual results to differ materially from those expressed or implied by the forward-looking statements include, but are not limited to the following:

- changes in market conditions, particularly in the new home construction, and residential remodeling and replacement (R&R) activity markets;
- changes in prevailing prices of resin and other raw material costs;
- changes in domestic and international economic conditions;
- changes in purchases by our principal customers;
- fluctuations in foreign currency exchange rates;
- our ability to maintain an effective system of internal controls;
- our ability to successfully implement our internal operating plans and acquisition strategies;
- our ability to successfully implement our plans with respect to information technology (IT) systems and processes;
- our ability to control costs and increase profitability;
- changes in environmental laws and regulations;
- changes in warranty obligations;
- changes in energy costs;
- changes in tax laws, and interpretations thereof;
- changes in interest rates;
- our ability to maintain a good relationship with our suppliers, subcontractors, and key customers; and
- the resolution of litigation and other legal proceedings.

For information on additional factors that could cause actual results to differ materially, please refer to the section entitled "Item 1A. Risk Factors" in our Annual Report on Form 10-K for the fiscal year ended October 31, 2013.

About Third-Party Information

In this report, we rely on and refer to information regarding industry data obtained from market research, publicly available information, industry publications, U.S. government sources and other third parties. Although we believe this information is reliable, we cannot guarantee the accuracy or completeness of the information and have not independently verified it.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis should be read in conjunction with the accompanying unaudited condensed consolidated financial statements and related notes as of July 31, 2014, and for the three- and nine-month periods ended July 31, 2014 and 2013, included elsewhere herein. For additional information pertaining to our business, including risk factors which should be considered before investing in our common stock, refer to our Annual Report on Form 10-K for the fiscal year ended October 31, 2013.

Our Business

We are a leading component supplier of engineered products in the residential building products markets. We manufacture (1) energy efficient window components that include flexible insulating glass spacers, (2) extruded vinyl profiles, (3) window and door screens, (4) solar panel sealants and (5) precision-formed metal and wood products for original equipment manufacturers (OEMs) in the residential and commercial window and door industries. We use low-cost production processes and engineering expertise to provide our customers with specialized products for their specific window and door applications. We believe these capabilities provide us with unique competitive advantages. We serve a primary customer base in North America, and also serve customers in international markets through our operating plants in the United Kingdom and Germany, as well as through sales and marketing efforts in other countries.

We continue to invest in organic growth initiatives and to pursue targeted business acquisitions, which may include vertically integrated vinyl extrusion businesses or screen manufacturers that allow us to expand our existing fenestration footprint, enhance our existing product offerings, acquire complementary technology, enhance our leadership position within the markets we serve, and expand into new markets or service lines.

We have four operating segments which we aggregate into one reportable business segment.

Recent Transactions and Events

On April 1, 2014, we sold our interest in a limited liability company which held the net assets of our Nichols Aluminum business (Nichols), the sole operating segment included in our Aluminum Sheet Products reportable segment, to Aleris International, Inc. (Aleris), a privately held Delaware corporation which provides aluminum rolled products and extrusions, aluminum recycling and specification aluminum alloy production. We received net proceeds of \$107.4 million, which includes a working capital adjustment of \$2.6 million which we paid in June 2014, resulting in a gain on the transaction of \$24.1 million, net of related taxes of \$15.1 million. We may be required to reimburse Aleris for certain severance costs related to Nichols employee terminations in accordance with the purchase agreement. Through July 31, 2014, we have paid \$0.4 million of such costs which has reduced the pre-tax gain on the sale. We entered into a transition services agreement (TSA) to provide certain administrative services to Nichols for the period from April 1, 2014 through May 31, 2014. These services included certain information technology support, employee benefit administration and payroll services. In addition, we expect to continue to purchase aluminum product from Nichols, which has historically totaled approximately \$12.0 million annually. Our purchases of aluminum product from Nichols for the three- and nine-month periods ended July 31, 2014 and 2013 were \$4.5 million and \$11.3 million, respectively, and \$2.8 million and \$10.2 million, respectively.

In November 2013, Nichols experienced a fire at its Decatur, Alabama facility, which damaged a cold mill used to press aluminum sheeting to a desired thickness. The loss was insured, subject to a \$0.5 million deductible. We capitalized \$6.5 million to rebuild the asset, which was returned to service as of March 31, 2014. We incurred an additional \$2.3 million associated with this loss, including an impairment of \$0.5 million related to retirement of the asset, moving costs, outside service costs, clean-up and the deductible. To date, we have received insurance proceeds of \$1.4 million. We expect to receive total insurance proceeds of approximately \$8.1 million, resulting in an expected gain on involuntary conversion of \$5.7 million. We have recorded a receivable of \$0.9 million as of July 31, 2014, equal to the loss incurred to date (difference between the expense incurred of \$2.3 million and the proceeds received of \$1.4 million), as we believe it is probable and estimable that we will receive proceeds at least equal to our loss incurred. We estimate the remaining gain on involuntary conversion at \$4.8 million. We expect to recognize this gain during the fourth quarter of 2014, when and to the extent that insurance proceeds are received, which will result in an increase in income from discontinued operations, net of tax.

In December 2013, we acquired certain vinyl extrusion assets of Atrium Windows and Doors, Inc. (Atrium) at a facility in Greenville, Texas, for \$5.2 million in cash (Greenville). We accounted for this transaction as a business combination resulting in an insignificant gain on the purchase. We entered into a supply agreement with Atrium related to the products produced at Greenville. We believe this acquisition expanded our vinyl extrusion capacity and positioned us with a platform from which to better serve our customers in the southern United States.

In August 2013, we ceased all activities associated with our enterprise resource planning (ERP) implementation and migrated several operating units which were utilizing the ERP prior to August 2013 back to legacy systems as of October 31, 2013, although we continue to use certain elements of the ERP at the corporate office. We recorded a change in accounting estimate during the fourth quarter of 2013 and accelerated depreciation associated with certain ERP assets. We incurred certain charges related to one-time termination benefits and contract termination costs which were not deemed significant.

Our former Chairman, President and Chief Executive Officer, Mr. David Petratis, retired from his position effective July 8, 2013. Mr. Petratis participated in a number of our stock-based and deferred compensation plans. In January 2014, we paid approximately \$3.3 million to Mr. Petratis, which represented his vested balances under our deferred compensation plan, and, in February 2014, we paid \$1.7 million to Mr. Petratis pursuant to our supplemental employee retirement plan.

In December 2012, we acquired substantially all of the assets of Alumco Inc. and its subsidiaries (Alumco) for \$22.1 million which included a working capital adjustment received of \$0.4 million, and subject to an earn-out provision for which we determined the criteria would not be met as of October 31, 2013. The purchase of Alumco allowed us to expand the scope of our fenestration business to include screens for vinyl windows and door manufacturers, and to expand our geographic reach throughout the United States. We believe this acquisition allowed us to build upon our national and regional original equipment manufacturer (OEM) customer base and to enhance our distribution capabilities. We recorded tax-deductible goodwill of \$2.8 million in conjunction with this transaction.

Market Overview and Outlook

We believe the primary drivers of our operating results continue to be new home construction and residential remodeling and replacement (R&R) activity. We believe that housing starts and window shipments are indicators of activity levels in the home building industry, and we use this data, as published by or derived from third-party sources, to evaluate the market.

Housing starts and window shipments in the United States have increased in recent years and continued to increase through the third quarter of 2014, although the rate of increase is less than forecasted in early 2014. The National Association of Homebuilders (NAHB) has forecasted calendar-year housing starts to increase from 0.9 million units in 2013 to 1.1 million units in 2014 and 1.2 million units in 2015, reflecting increasing consumer confidence and a healthier economy. Ducker Worldwide, LLC (Ducker), a consulting and research firm, indicated that window shipments in the R&R market are expected to increase from 26.3 million units in 2013 to 27.8 million units in 2014 and 29.2 million units in 2015, and new construction window shipments are forecasted to increase at a higher pace. Derived from reports published by Ducker, the overall growth in window shipments for the trailing twelve-month period ended June 30, 2014 was 5.5%. During this period, growth in new construction increased 8.2%, while growth in R&R activity increased 3.9%. Growth in new construction continues to outpace the growth in R&R, with a greater portion of the new construction associated with multi-family housing. According to the July 31, 2014 publication, "Multifamily Mid Year Outlook 2014" by the Federal Home Loan Mortgage Corporation, a public government-sponsored enterprise, the economic recession has resulted in an estimated 3.9 million delayed household formations. With supply of single-family homes tight and rising home prices, we believe this delay in housing formation has contributed to the growth in multi-family housing, particularly with Millennials, 18-to-34-year-olds, who account for 75% of estimated housing demand and are more likely to rent than buy.

The United States government has been reluctant to enforce stricter energy standards, but higher energy efficiency standards in Europe are impacting the industry. We continue to be optimistic about our growth prospects in Europe, particularly in the United Kingdom, Germany and Scandinavian countries, where the push for higher energy efficiency standards has been the greatest. Older technology cold-edge spacers are still a dominant force in these regions and garner a larger portion of the total market share in Europe relative to the United States. We operate warm-edge spacer plants in the United Kingdom and in Germany, where we added a third production line during the fourth quarter of 2013. We believe we can become the provider of choice as demand for more energy-efficient warm edge spacers grows and eventually displaces cold edge spacers.

The housing recovery continues to improve in the United States, but there remain challenges to growth prospects in the fenestration market that we serve including the Canadian market. Due to seasonality, activity levels generally increase during the summer months, which favorably impacts our operating results for the second half of our fiscal year.

Results of Operations

Three Months Ended July 31, 2014 Compared to Three Months Ended July 31, 2013

	Three Months Ended July 31,			
	2014	2013	Change \$	Change %
	(Dollars in millions)			
Net sales	\$ 170.0	\$ 156.8	\$ 13.2	8 %
Cost of sales (excluding depreciation and amortization)	130.7	116.0	14.7	13 %
Selling, general and administrative	18.1	23.0	(4.9)	(21)%
Depreciation and amortization	8.5	10.4	(1.9)	(18)%
Operating income	<u>\$ 12.7</u>	<u>\$ 7.4</u>	<u>\$ 5.3</u>	<u>72 %</u>
Interest expense	(0.1)	(0.2)	0.1	(50)%
Income tax expense	(4.0)	(2.0)	(2.0)	100 %
Income from continuing operations	\$ 8.6	\$ 5.2	\$ 3.4	65 %
Loss from discontinued operations, net of tax	\$ (0.5)	\$ (0.2)	\$ (0.3)	150 %
Net income	<u>\$ 8.1</u>	<u>\$ 5.0</u>	<u>\$ 3.1</u>	<u>62 %</u>

Net Sales. Net sales increased \$13.2 million, or 8%, for the three months ended July 31, 2014 compared to the same period in 2013. Although the broader fenestration market continues to recover, the year-over-year growth in window shipments reflected a growth rate of only 4.5%, derived from preliminary data provided by Ducker for the year-over-year calendar quarters ended June 30, 2014 and 2013. By comparison, our growth rate for the same period was 6.7%, as adjusted for certain foreign and other results to be more comparable to Ducker. Our net sales increase is largely due to an increase in demand for our core insulating glass spacer products and window screen accessory products. Additionally, the acquisition of the Greenville assets in December 2013 contributed favorably to the sales increase. We did experience negative margin impacts in our vinyl extrusion products due to price concessions, as well as contractual limitations in existing annual contracts, which limited the extent to which we could pass increased vinyl resin costs to these customers. In general, we continue to outpace the market growth rate, due in part to our breadth of product offerings and sales mix.

Cost of Sales. The increase in cost of sales of \$14.7 million, or 13%, for the three months ended July 31, 2014 compared to the same period in 2013 correlates with an increase of 8% in net sales as discussed above, however, margins were negatively impacted by a series of cost increases for resin, a major raw material used in our vinyl extrusion products. We have been unable to recoup the increase in resin cost from some customers through surcharges due to contractual limitations. In addition, we experienced labor inefficiencies, higher repair and maintenance costs, and higher freight costs, all attributable to our vinyl products. These increases in cost were partially offset by favorable material price variances for our spacer products.

Selling, General and Administrative. Our selling, general and administrative expenses decreased by \$4.9 million, or 21%, for the three months ended July 31, 2014 compared to the same period in 2013. Of this decrease, \$1.7 million was attributable to our ERP implementation efforts during the third quarter of 2013. This effort was ceased in August 2013, with no such charges incurred during the third quarter of 2014. In addition, we reduced the size of our information technology group which had been expanded to service the new ERP, and reduced headcount overall due to attrition, with some selective restructuring efforts during the fourth quarter of 2013 and into the first quarter of 2014, to better align our cost structure. We also experienced a decrease in stock-based compensation and compensation associated with long-term incentive arrangements tied to the performance of our common stock. These cost reductions were partially offset by higher incentive accruals based on earnings and higher insurance costs.

Depreciation and Amortization. Depreciation and amortization expense decreased \$1.9 million, or 18%, for the three months ended July 31, 2014 compared to the same period in 2013. This decrease was primarily due to the cessation of the ERP implementation in August 2013 and the related accelerated depreciation write-off. For the three months ended July 31, 2013, we incurred \$2.1 million of depreciation expense associated with the implementation compared to \$0.4 million for the respective period in 2014 (attributable to the remaining assets which are currently in service). The remainder of the decrease in depreciation expense relates to the run-off of depreciation and intangible asset amortization associated with the Alumco acquisition in December 2012 (incremental increase in 2013 compared to 2014), partially offset by the incremental effect of depreciation and amortization expense associated with fixed and intangible assets which were placed into service during the trailing twelve months ended July 31, 2014.

Interest Expense. Interest expense increased slightly for the three-month periods ended July 31, 2014 and 2013, due primarily to additional interest associated with new capital leases.

Income Taxes. Our estimated annual effective tax rates for the three months ended July 31, 2014 and 2013 were 31.6% and 28.2%, respectively. The difference in the effective rates is primarily due to the effect of permanent book-to-tax differences.

Income (Loss) from Discontinued Operations, Net of Tax. We recorded a loss of \$0.5 million associated with the sale of the Nichols business, primarily associated with the working capital true-up settled in June 2014, whereby we paid more than had been previously accrued, and we adjusted the tax rate associated with the gain. The loss of \$0.2 million recorded during the three-months ended July 31, 2013 was largely attributable to the effect of aluminum commodity prices on Nichols' operating results.

Nine Months Ended July 31, 2014 Compared to Nine Months Ended July 31, 2013

	Nine Months Ended July 31,			
	2014	2013	Change \$	Change %
	(Dollars in millions)			
Net sales	\$ 431.6	\$ 388.0	\$ 43.6	11 %
Cost of sales (excluding depreciation and amortization)	335.5	295.1	40.4	14 %
Selling, general and administrative	61.0	75.0	(14.0)	(19)%
Depreciation and amortization	25.6	28.2	(2.6)	(9)%
Asset impairment charges	0.5	—	0.5	100 %
Operating income (loss)	\$ 9.0	\$ (10.3)	\$ 19.3	(187)%
Interest expense	(0.4)	(0.5)	0.1	(20)%
Other, net	—	(0.1)	0.1	(100)%
Income tax (expense) benefit	(3.3)	4.0	(7.3)	(183)%
Income (loss) from continuing operations	\$ 5.3	\$ (6.9)	\$ 12.2	(177)%
Income (loss) from discontinued operations, net of tax	\$ 19.0	\$ (3.6)	\$ 22.6	(628)%
Net income (loss)	\$ 24.3	\$ (10.5)	\$ 34.8	(331)%

Net Sales. Net sales increased \$43.6 million, or 11%, for the nine months ended July 31, 2014 compared to the same period in 2013. The results for 2014 include incremental sales of \$11.3 million associated with the Alumco business acquired in December 2012, reflecting nine months of activity in 2014 versus seven months of activity in 2013, as well as the effect of price increases during the third quarter of 2014 and increased volume for our insulating glass spacer products and window screen accessory products. Our vinyl product sales were favorably impacted by the volume associated with the Greenville asset acquisition in December 2013, as well as certain resin surcharges which were implemented during January 2014, as a response to price increases from our resin suppliers. Our sales were unfavorably impacted by price concessions, contractual provisions in annual contracts that limit the amount of increased vinyl resin cost we can pass to customers, other pricing pressure and an increase in sales returns and allowances. Overall improvement in the housing market in the United States is trending toward new construction of multi-family homes which generally contain lower-cost, less energy-efficient windows. Window shipments, derived from preliminary data provided by Ducker for the year-over-year nine-month periods ended June 30, 2014 and 2013, reflect an overall growth rate of 4.4% compared to a growth rate of 7.7% for our year-over-year results during the same period, as adjusted for certain foreign and other results, including pro forma results for Alumco, to be more comparable to Ducker.

Cost of Sales. The increase in cost of sales of \$40.4 million, or 14%, for the nine months ended July 31, 2014 compared to the same period in 2013 correlates with an increase of 11% in net sales, as described above. The primary reason for the decrease in margin during 2014 was related to a series of price increases for resin, a major raw material used in our vinyl products. We also experienced labor inefficiencies partially attributable to delays and training costs associated with new extrusion lines, higher repair and maintenance costs, and freight costs. These increases in cost were partially offset by favorable material price variances for butyl, a commodity used for our spacer products, as well as other material savings. In addition, we recorded a decrease in warranty accruals of \$3.1 million, of which \$2.8 million related to a warranty accrual for a specific customer which was settled in December 2013.

Selling, General and Administrative. Our selling, general and administrative expenses decreased \$14.0 million, or 19%, for the nine months ended July 31, 2014 compared to the same period in 2013. Of this amount, \$7.0 million represents the cost incurred in 2013 associated with our ERP implementation project which was ceased in August 2013. No such implementation costs were incurred for the comparative period in 2014. In addition, we reduced our headcount associated with the information technology

structure that was originally built to support the ERP system, as well as a streamlining of our sales and marketing group, selective reductions impacting our engineered components business and reductions associated with normal employee attrition. In 2013, we incurred \$1.0 million in transaction fees (primarily associated with the Alumco acquisition) and higher stock-based compensation expense and higher compensation cost associated with long-term incentive arrangements tied to the performance of our common stock. These year-over-year cost reductions for 2014 were partially offset by higher incentive accruals based on earnings and higher insurance costs.

Depreciation and Amortization. Depreciation and amortization expense decreased \$2.6 million, or 9%, for the nine months ended July 31, 2014 compared to the same period in 2013. For the nine months ended July 31, 2013, we incurred incremental costs of \$2.3 million of depreciation expense associated with the assets placed in service in conjunction with the ERP implementation. When the project ceased in August 2013, the remaining useful lives for the majority of the assets were accelerated to October 2013. Therefore, a relatively small amount of depreciation expense was incurred in Fiscal 2014 associated with the ERP implementation effort. In addition, we incurred depreciation expense associated with assets placed into service during the trailing twelve months ended July 31, 2014, including the Greenville assets acquired in December 2013, partially offset by the incremental depreciation and amortization associated with the Alumco acquisition, which had a larger impact on 2013 since the assets acquired had a relatively short useful life. Also affecting the results was the normal run-off of fixed assets and intangible assets which became fully depreciated during these periods.

Asset Impairment Charges. We recorded an impairment loss of \$0.5 million in April 2014 associated with a facility in Barbourville, Kentucky. This facility was subsequently sold in May 2014, resulting in an insignificant realized loss on the sale.

Interest Expense. Interest expense decreased slightly when comparing the nine-month periods ended July 31, 2014 and 2013. During 2013, we borrowed \$23.5 million to fund the Alumco acquisition and other working capital needs. This debt was retired within several months. No similar borrowings have occurred during the nine months ended July 31, 2014.

Other, Net. Other, net expense for the nine-month periods ended July 31, 2014 and 2013 was relatively consistent and reflected net gains and losses on foreign currency exchange transactions and interest income.

Income Taxes. Our estimated annual effective tax rate for the nine months ended July 31, 2014 was 38.2% on pre-tax earnings of \$8.6 million, compared to a benefit of 36.5% on a pre-tax loss of \$10.9 million for the nine months ended July 31, 2013. Additional items impacting the effective rate were the foreign tax rate differential, the effect of permanent book-to-tax differences, return to actual results and a discrete item incurred in January 2014 associated with the incorporation of our U.K. branch as a subsidiary.

Income (Loss) from Discontinued Operations, Net of Tax. We sold Nichols on April 1, 2014 and recorded a gain on the sale of \$23.6 million, net of tax of \$15.3 million. Excluding this gain, the loss from discontinued operations would have been a loss of \$4.6 million for the period from November 1, 2013 (start of the fiscal year) through the date of sale, April 1, 2014, compared to a loss of \$3.6 million for the nine months ended July 31, 2013. The results for Nichols reflected the impact of aluminum commodity prices, which contributed to lower throughput and lower volume.

Liquidity and Capital Resources

Overview

Our principal sources of funds are cash on hand, cash flow from operations, and borrowings under our \$150 million Senior Unsecured Revolving Credit Facility (the Credit Facility). As of July 31, 2014, we had \$134.2 million of cash and cash equivalents, \$143.0 million of availability under the Credit Facility and outstanding debt of \$0.8 million, of which no amounts were outstanding under our Credit Facility.

Cash and cash equivalents increased by \$84.5 million during the nine months ended July 31, 2014 due primarily to the sale of Nichols which provided net proceeds of \$107.4 million, partially offset by funds used for the Greenville acquisition, capital investments in our manufacturing facilities, dividends paid and on-going operational activities.

Analysis of Cash Flow

The following table summarizes our cash flow results for the nine months ended July 31, 2014 and 2013:

	Nine Months Ended	
	July 31,	
	2014	2013
	(In millions)	
Cash flows provided by operating activities	\$ 9.8	\$ 6.6
Cash flows provided by (used in) investing activities	\$ 75.5	\$ (56.3)
Cash flows used in financing activities	\$ (0.7)	\$ (4.9)

Operating Activities. Cash provided by operating activities for the nine-month period ended July 31, 2014 increased by approximately \$3.2 million compared to the nine-month period ended July 31, 2013. The increase in our sales revenue and the timing of receivable collections contributed to higher gross cash inflows this year, partially offset by an increase in inventory associated with the seasonal build. Working capital was \$190.1 million, \$114.4 million and \$76.6 million as of July 31, 2014, October 31, 2013 and July 31, 2013, respectively.

Investing Activities. Cash provided by investing activities for the nine months ended July 31, 2014 was \$75.5 million compared to cash flow used for investing activities of \$56.3 million for the nine months ended July 31, 2013, a change of \$131.7 million. The primary driver of this increase was net proceeds of \$107.4 million from the sale of Nichols, an incremental decrease in cash used for acquisitions of \$16.9 million and an incremental decrease in cash used for capital expenditures of \$5.5 million.

Financing Activities. Cash used for financing activities was \$0.7 million for the nine-month period ended July 31, 2014, of which \$4.5 million was used to pay dividends, partially offset by \$3.2 million in proceeds from the issuance of common stock associated with exercises of employee stock options and \$0.6 million associated with stock option-related tax benefits.

Liquidity Requirements

Our strategy for deploying cash is to invest in organic growth opportunities, develop our infrastructure and make strategic acquisitions. Other uses of cash include paying cash dividends to our shareholders and opportunistically repurchasing our common stock. Any excess cash and cash equivalents are invested in commercial paper with terms of three months or less. Prior to April 2014, we invested in overnight money market funds. The funds were diversified by security type across Treasuries, Government Agencies and Prime Corporate. These funds were all AAA-rated, approved by the National Association of Insurance Commissioners and compliant with Rule 2A-7 of the Investment Company Act of 1940. Our investments are diversified across multiple institutions that we believe are financially sound. We intend to remain in commercial paper, highly rated money market funds, financial institutions and treasuries following a prudent investment philosophy. From time to time, to prepare for potential disruption in the money markets, we may temporarily move funds into operating bank accounts of highly-rated financial institutions to meet on-going operational liquidity requirements. We did not experience any material losses on our cash and marketable securities investments during the nine-month periods ended July 31, 2014 and 2013. We maintain cash balances in foreign countries which total \$6.9 million as of July 31, 2014. We consider these funds to be permanently reinvested in these countries.

Senior Credit Facility

Prior to January 28, 2013, we maintained a \$270.0 million senior unsecured revolving credit facility (the Retired Facility) which had been executed on April 23, 2008 and was scheduled to mature on April 23, 2013. The Retired Facility provided for up to \$50.0 million of standby letters of credit, limited based on availability, as defined. Amounts borrowed under the facility were to bear interest at a spread above the London Interbank Borrowing Rate (LIBOR) based on a combined leverage and ratings grid. In addition, the Retired Facility contained restrictive debt covenants, as defined in the indenture, and contained certain limits on additional indebtedness, asset or equity sales and acquisitions. For the period from November 1, 2012 through January 28, 2013, we were in compliance with our debt covenants and did not borrow funds pursuant to the Retired Facility.

On January 28, 2013, we replaced the Retired Facility by entering into a new \$150 million senior unsecured revolving credit facility that has a five-year term, maturing on January 28, 2018, and which permits aggregate borrowings at any time of up to \$150 million, with a letter of credit sub-facility, a swing line sub-facility and a multi-currency sub-facility. Borrowings denominated in U.S dollars bear interest at a spread above LIBOR or a base rate derived from the prime rate. Foreign denominated borrowings bear interest at a spread above LIBOR applicable to such currencies. Subject to customary conditions, we may request that the aggregate commitments under the Credit Facility be increased by up to \$100 million, with total commitments not to exceed \$250 million.

The Credit Facility requires us to comply with certain financial covenants, the terms of which are defined therein. Specifically, we must not permit, on a quarterly basis, our ratio of consolidated EBITDA to consolidated interest expense as defined (Minimum Interest Coverage Ratio), to fall below 3.00:1, or our ratio of consolidated funded debt to consolidated EBITDA as defined (Maximum Consolidated Leverage Ratio), to exceed 3.25:1. The Maximum Consolidated Leverage Ratio is the ratio of consolidated EBITDA to consolidated interest expense, in each case for the previous four consecutive fiscal quarters. EBITDA is defined by the indenture to include pro forma EBITDA of acquisitions and to exclude certain items such as goodwill and intangible asset impairments and certain other non-cash charges and non-recurring items. Subject to our compliance with the covenant requirements, the amount available under the Credit Facility is a function of: (1) our trailing twelve month EBITDA; (2) the Minimum Interest Coverage Ratio and Maximum Consolidated Leverage Ratio allowed under the Credit Facility; and (3) the aggregate amount of our outstanding debt and letters of credit. As of July 31, 2014, we were in compliance with the financial covenants set forth in the Credit Facility, as indicated in the table below:

		Required	Actual
Minimum Interest Coverage Ratio	No less than	3.00:1	98.32:1
Maximum Consolidated Leverage Ratio	No greater than	3.25:1	0.12:1

The Credit Facility also contains certain limitations on additional indebtedness, asset or equity sales and acquisitions. The payment of dividends and other distributions is permitted, provided there is no event of default after giving effect to such transactions. If the counterparties to the Credit Facility were unable to fulfill their commitments, the funds available to us could be reduced. However, we have no reason to believe that such liquidity will be unavailable or reduced.

We believe that we have sufficient funds and adequate financial resources available to meet our anticipated liquidity needs. We also believe our cash balances and cash flow from operations will be sufficient in the next twelve months and foreseeable future to finance our anticipated working capital requirements, capital expenditures, debt service requirements, and dividends.

As of July 31, 2014, the amount available to us for use under the Credit Facility was limited to \$143.0 million and we had outstanding letters of credit of \$6.1 million. For the nine-month period ended July 31, 2014, we did not borrow any amount under the Credit Facility, and thus had no outstanding borrowings at July 31, 2014. Our current borrowing rate under the Credit Facility was 3.25% and 1.20% for the swing-line sub facility and the revolver, respectively, at July 31, 2014.

Repurchases of Outstanding Securities

On May 27, 2010, our Board of Directors approved a stock repurchase program that authorized the repurchase of 1,000,000 shares of our common stock. On August 25, 2011, our Board of Directors authorized an additional 1,000,000 shares under this repurchase program. There were no repurchases of shares during the nine months ended July 31, 2014. As of July 31, 2014, there were 905,663 authorized shares remaining available for purchase pursuant to the program. Our Board cancelled the existing program on September 5, 2014, and approved a new stock repurchase program authorizing us to repurchase up to \$75 million worth of shares of our common stock.

Critical Accounting Policies and Estimates

The preparation of our financial statements in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP) requires us to make estimates and assumptions that affect the reported amount of assets, liabilities, revenues and expenses and related disclosures of contingent assets and liabilities. Estimates and assumptions about future events and their effects cannot be perceived with certainty. Estimates may change as new events occur, as more experience is acquired, as additional information becomes available and as our operating environment changes. We base our estimates on historical experience and on various other assumptions that we believe are reasonable under the circumstances, and that we believe provide a basis for making judgments about the carrying value of assets and liabilities that are not readily available through open market quotes. We must use our judgment with regard to uncertainties in order to make these estimates. Actual results could differ from these estimates.

For a description of our critical accounting policies and estimates, see our Annual Report on Form 10-K for the fiscal year ended October 31, 2013. Our critical accounting policies and estimates have not changed materially during the nine months ended July 31, 2014, except with regard to our critical accounting policy associated with income taxes. For more information related to this item, see additional disclosures in our Quarterly Report on Form 10-Q for the quarter ended January 31, 2014.

New Accounting Pronouncements

From time to time, new accounting pronouncements are issued by the FASB or other standards setting bodies that we adopt as of the specified effective date. Unless otherwise discussed, we believe the impact of any other recently issued standards that are not yet effective are either not applicable to us at this time or will not have a material impact on our consolidated financial statements upon adoption. See Note 16, "New Accounting Pronouncements", contained elsewhere herein.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The following discussion of our exposure to various market risks contains "forward looking statements" regarding our estimates, assumptions and beliefs concerning our exposure. Although we believe these estimates and assumptions are reasonable in light of information currently available to us, we cannot provide assurance that these estimates will not materially differ from actual results due to the inherent unpredictability of interest rates, foreign currency rates and metal commodity prices as well as other factors. We do not use derivative financial instruments for speculative or trading purposes.

Interest Rate Risk

Our outstanding debt bears interest at variable rates and accordingly is sensitive to changes in interest rates. Based upon the balances of the variable rate debt at July 31, 2014, a hypothetical 1.0% increase or decrease in interest rates would result in a \$0.01 million additional pre-tax charge or credit to our operating results.

Foreign Currency Rate Risk

Our international operations have exposure to foreign currency rate risks, primarily due to fluctuations in the Euro, the British Pound and the Canadian dollar. From time to time, we enter into foreign exchange contracts associated with our operations to manage a portion of the foreign currency rate risk.

The notional and fair market values of these positions at July 31, 2014 and October 31, 2013, were as follows:

		Notional as indicated		Fair Value in \$	
		July 31, 2014	October 31, 2013	July 31, 2014	October 31, 2013
		(In thousands)			
Foreign currency derivatives:					
Sell EUR, buy USD	EUR	4,045	7,258	\$ 14	\$ 150
Sell CAD, buy USD	CAD	403	615	3	(2)
Sell EUR, buy GBP	EUR	61	880	—	14
Buy EUR, sell GBP	EUR	—	967	—	(12)
Buy GBP, sell USD	GBP	—	2,435	—	(25)

At July 31, 2014 and October 31, 2013, we held foreign currency derivative contracts hedging cross-border intercompany and commercial activity for our insulating glass spacer business. Although these derivatives hedge our exposure to fluctuations in foreign currency rates, we do not apply hedge accounting and therefore, the change in the fair value of these foreign currency derivatives is recorded directly to other income and expense in the accompanying consolidated statements of income (loss). To the extent the gain or loss on the derivative instrument offsets the gain or loss from the remeasurement of the underlying foreign currency balance, changes in exchange rates should have no effect. See Note 10, "Derivative Instruments", contained elsewhere herein.

Commodity Price Risk

Historically, we have entered into swap contracts to minimize our exposure to aluminum commodity prices. Through the use of swap contracts, we attempt to protect ourselves from the effects of changing prices of aluminum on our cost of sales. To the extent that the raw material costs factored into the firm price sales commitments are matched with firm price raw material purchase commitments, changes in aluminum prices should have no effect.

The following table indicates the notional volume as well as the fair value of the open swap contracts as of October 31, 2013.

	Notional in LBS		Fair Value in \$	
	July 31, 2014	October 31, 2013	July 31, 2014	October 31, 2013
Aluminum derivatives:				
		(In thousands)		
Aluminum swap contracts	—	187	\$ —	\$ (64)

While we consider derivative contracts to provide an economic hedge against changes in aluminum prices, the derivatives were not designated as hedges in accordance with ASC 815 for accounting purposes. As such, any mark-to-market net gain or loss was recorded in cost of sales, with the offsetting asset or liability reflected on the balance sheet. See Note 10, "Derivative Instruments", contained elsewhere herein.

We purchase polyvinyl resin (PVC) as the significant raw material consumed in the manufacture of vinyl extrusions. We have a monthly resin adjuster in place with a majority of our customers and our resin supplier that is adjusted based upon published industry indices for resin prices for the prior month. This adjuster effectively shares the base pass-through price changes of PVC with our customers commensurate with the market at large. Our long-term exposure to changes in PVC prices is somewhat mitigated due to the contractual component of the resin adjuster program; however, there is a level of exposure to short-term volatility due to a one month lag and not all of our customer contracts currently include such cost adjusters. From time to time, we may lock in customer pricing for less than one year or make other customer concessions which result in us becoming exposed to fluctuations in resin pricing.

We maintain an oil-based materials surcharge on one of our major product lines. The surcharge is intended to offset the rising cost of products which are highly correlated to the price of oil, including butyl and other oil-based raw materials. The surcharge is in place with the majority of our customers who purchase these products and is adjusted monthly based upon the 90 day average published price for Brent crude. The oil-based raw materials purchased by us are subject to similar pricing schemes. Therefore, our long-term exposure to changes in oil-based raw material prices is significantly reduced under this surcharge program.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Under the supervision and with the participation of our management, including the Chief Executive Officer and Chief Financial Officer, we have evaluated the effectiveness of our disclosure controls and procedures pursuant to Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (1934 Act) as of July 31, 2014. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that, as of July 31, 2014, the disclosure controls and procedures are effective.

Changes in Internal Control over Financial Reporting

There have been no changes in internal controls over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the 1934 Act) during the most recent fiscal quarter that have materially affected or are reasonably likely to materially affect our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

On May 27, 2010, our Board of Directors approved a stock repurchase program that authorized the repurchase of 1,000,000 shares of our common stock. On August 25, 2011, our Board of Directors authorized an additional 1,000,000 shares under this repurchase program. There were no repurchases of shares during the nine months ended July 31, 2014. As of July 31, 2014, there were 905,663 authorized shares remaining available for purchase pursuant to the program. Our Board cancelled the existing program on September 5, 2014, and approved a new stock repurchase program authorizing us to repurchase up to \$75 million worth of shares of our common stock.

Item 6. Exhibits

The exhibits required to be furnished pursuant to Item 6 are listed in the Exhibit Index filed herewith, which Exhibit Index is incorporated herein by reference.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

† Management Compensation or Incentive Plan

As permitted by Item 601(b)(4)(iii)(A) of Regulation S-K, the Registrant has not filed with this Quarterly Report on Form 10-Q certain instruments defining the rights of holders of long-term debt of the Registrant and its subsidiaries because the total amount of securities authorized under any of such instruments does not exceed 10% of the total assets of the Registrant and its subsidiaries on a consolidated basis. The Registrant agrees to furnish a copy of any such agreements to the Securities and Exchange Commission upon request.

CHIEF EXECUTIVE OFFICER CERTIFICATION

I, William C. Griffiths, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Quanex Building Products Corporation (the “Registrant”);
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the Registrant as of, and for, the periods presented in this report;
4. The Registrant’s other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures [as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)] and internal control over financial reporting [as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)] for the Registrant and have:
 - a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the Registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c. Evaluated the effectiveness of the Registrant’s disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d. Disclosed in this report any change in the Registrant’s internal control over financial reporting that occurred during the Registrant’s most recent fiscal quarter (the Registrant’s fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the Registrant’s internal control over financial reporting; and
5. The Registrant’s other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the Registrant’s auditors and the audit committee of the Registrant’s board of directors (or persons performing the equivalent functions):
 - a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the Registrant’s ability to record, process, summarize and report financial information; and
 - b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the Registrant’s internal control over financial reporting.
